Satisfactory Progress

1. Students who receive a grade of incomplete are expected to clear that grade in the succeeding semester.

2. Students are expected to maintain a cumulative GPA of 3.0. If a student's GPA drops below 3.0, the student will be placed on probation and will have one semester to raise the cumulative GPA to 3.0 or above. Dismissal from the program will result if this is not achieved.

3. Grades of BC or C are normally not accepted toward program requirements.
   Exceptions:
   A) Grades must be approved by the student's evaluation/advisory committee and noted in the advisor memo.
   B) Grades of BC or C may not be used in the area specialty.

4. Courses graded Pass/Fail will not be counted toward program requirements.

5. A maximum of 3 credits of course work, such as independent study or seminars, that is graded S (satisfactory) may be counted toward program requirements with permission of the evaluation/advisory committee.

6. *Students must complete at least 16 credits of graduate work that count toward their degree requirements within 12 months of enrollment and must complete their evaluation and guidance conference by the end of their first semester, otherwise you will not be allowed to enroll in Envir St 718. If you started the WRM program before Fall 2008, then you should be completing your E&G by the end of your second semester. Students enrolled in double degree programs or those who are not enrolled full-time may have this timetable extended with approval of the program chair.

*Note: The Water Resources Management program committee must approve exceptions to the above procedures. Such appeals will be considered on a case-by-case basis.

A candidate for an M.S. degree who does not enroll for FIVE OR MORE CONSECUTIVE YEARS will be considered to have lost all credits according to the Graduate School’s minimum credit requirement.
